

An Initiative of

A stylized illustration of a human head in profile, facing right. The head is rendered in a translucent blue color. Inside the head, the brain is depicted with a glowing red and pink hue, showing intricate neural pathways. A hand is shown touching the forehead, with the fingers pointing towards the brain. The background is a dark gradient with some red circular shapes in the top right corner.

STROKE

A stylized white profile of a human head facing left, with a red dot on the forehead.

SUMMIT **2021**

ACT FAST
for a
STROKE READY INDIA

OVERVIEW

India is facing a rapidly growing burden of diseases, especially the non-communicable diseases (NCDs). Stroke is definitely one of them – it often goes undiagnosed and even if identified, is not addressed on time due to lack of qualified workforce and Stroke Ready Infrastructure. Every year, approximately 1.8 million people suffer from stroke, which is the second most common cause of death after coronary artery disease (CAD) globally. According to the Global Burden of Disease Study, 25.7 million people survived stroke, 6.5million died, and 10.3 million new strokes were recorded. It also noted that the low-and middle-income countries (LMICs), of which India is a part, have witnessed more than 100 percent increase in the incidence of stroke whereas the developed countries have witnessed a drop of 42 percent.

Given the paucity of data and lack of reliable reporting mechanisms, understanding the epidemiology of stroke in India is challenging. Hence, a systematic review with an objective to investigate the incidence & prevalence, and understand the true magnitude of the problem, we need to Act Now & Fast, create a smart infrastructure at both the State and national level for better preventive measures against stroke and better rehabilitation measures for stroke-related disabilities, and make India Stroke Ready.

STROKE SUMMIT INITIATIVE

With the mission to “Act FAST for a Stroke Ready India”, the Stroke Summit initiative by Integrated Health & Wellbeing Council is one of the largest knowledge, idea and technology sharing platform to showcase multi-stakeholder engagement to drive awareness, education, and advocacy for increasing preparedness for prevention and management of the disease as well as to provide quality stroke care to the victims.

The Summit becomes a platform for experts and thought leaders from public health, private enterprises, policymaking, and the social sector, including the many segments of the healthcare ecosystem to come forward and debate various matters related to stroke care for public benefit.

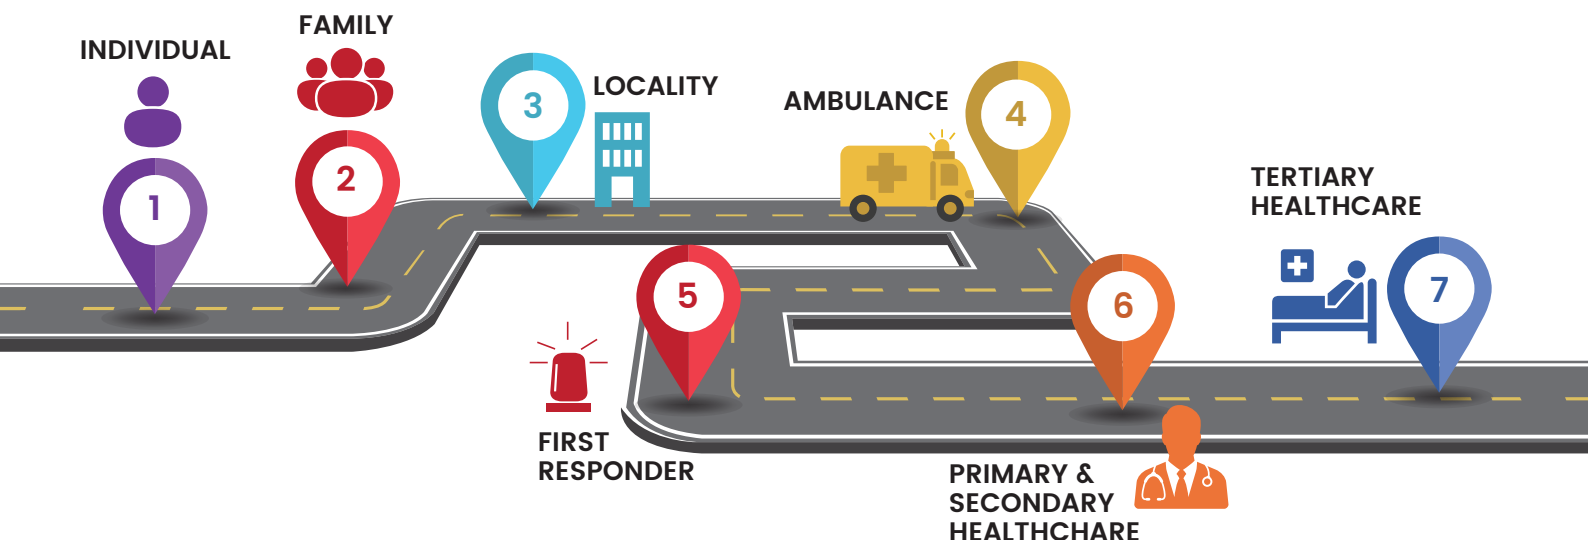

STROKE

MISSION STROKE READY INDIA

To create a Stroke Ready India by improving healthcare ecosystem that can contribute in reducing stroke incidence while improving stroke management across functions of public health pathway.

- To unify various people, efforts, and ideas for addressing the alarming Stroke incidence rates in the country
- To mobilize policy-making for strengthening various verticals for creating a stroke-ready India.
- To utilize various channels of education, awareness, and information propagation on Stroke for a more informed society.

Experts at the Stroke Summit call for an integrated approach to treatment and rehabilitation in India

Noting that the incidence of stroke has in India increased almost 100% in the past few decades, neurologists and public health experts called for an integrated and comprehensive approach to address the growing burden of stroke at the first Stroke Summit, organised by premier health think tank Integrated Health & Wellbeing (IHW) Council and endorsed by the World Stroke Organization.

Noting that stroke is the leading cause of death in north-eastern states of India, surpassing cardiac problems and tuberculosis, Dr MV Padma Srivastava, head, Neurosciences Centre, AIIMS, said, "Stroke has become the fifth leading cause of death in 2016 from 12th cause in 1996 and claims 119-145 lives in every 1,00,000 population, which is almost a 100% increase. Our stroke burden is enormous but we need more of small, India-centric solutions. Every year, 1.8 million people suffer stroke in India, but we have only about 2000 neurologists. We need to understand and acknowledge that 'time is brain' and plug the gaps such as lack of awareness, delay in treatment...

STROKE SUMMIT 2021

ABOUT STROKE SUMMIT 2021

After the successful previous editions, Integrated Health & Wellbeing Council of India continuing the momentum in 2021 to strengthen the impact of awareness regarding Stroke prevention, management, treatment, and advances in stroke through a series of engagement programs. The Stroke Summit 2021 will witness experts and thought leaders from various sectors of public health, private enterprises, policymaking, and the social sector, including various segments of the healthcare ecosystem to come forward and debate various matters related to stroke for public benefit.

After creating an impact worldwide through our previous editions, Stroke Summit 2021 will highlight the Socio Economic Impacts on Health Infrastructure, discuss about Stroke Rehabilitation & Recovery in addition to other informative sessions. Stroke Summit 2021 will also focus on advocating the need for awareness in the common public and learn about the lifestyles changes needed in the Young Adults, via its Talk Shows.

Strategic intent for stroke summit will be to raise awareness and invite policy makers to share their concern. The summit will focus on how public private partnership can lead the path of making India stroke ready by 2028

PROPOSED AGENDA

1. Stroke Burden in India: Socio Economic Impacts on Health Infrastructure

With around only 2000 Neurologists for 1.8 million stroke patients in India, the burden on the health infrastructure is increasing every year. India lacks a stroke ready infrastructure and workforce. This session will highlight the current scenario and reality of stroke care in India, and the socio economic impact it has on the nation.

2. Mechanical Thrombectomy scenario in India

What happens when a patient with stroke attack reaches hospital after 5 or 6 Hrs after stroke attack? In India more than 65% people lives in villages, and they need time to reach to a center where stroke attack can be treated, What is the mechanical thrombectomy model and how it is helping stroke patients and saving many lives

3. Technological Advances in Stroke Imaging, Management & Recovery

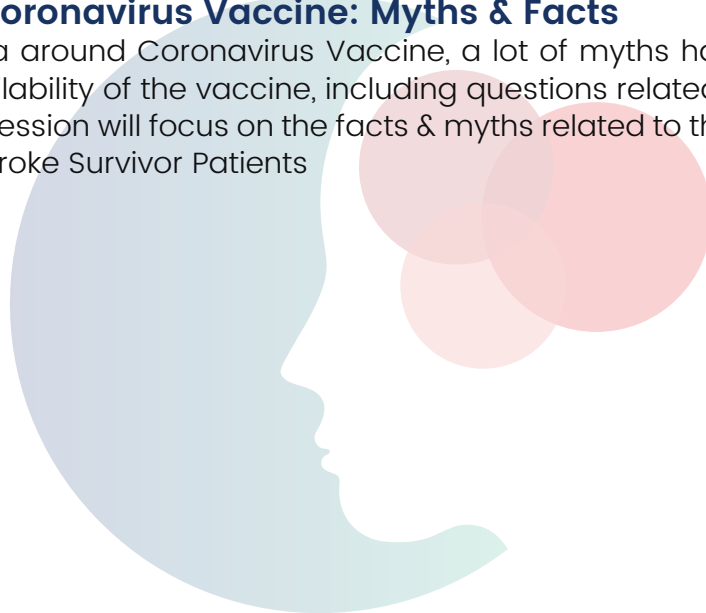

This session will highlight the role of technology in Stroke Rehabilitation & Recovery. The session will cover the technological advancements in Stroke Imaging that can help reduce the delays in treatments and provide a chance of full recovery to patients.

4. Stroke Rehabilitation & Recovery

A stroke occurs when part of the brain loses its blood supply and stops working. This causes the part of the body that the injured brain controls to stop working. People who survive a stroke have to be compelled to acquire skills they lost because of the injury. Rehabilitation helps them acquire those skills. This session will highlight the journey and possibilities for recovering from a Stroke.

5. Stroke & Coronavirus Vaccine: Myths & Facts

With the stigma around Coronavirus Vaccine, a lot of myths have emerged regarding the safety and availability of the vaccine, including questions related to Vaccine Safety & Stroke Survivors. This session will focus on the facts & myths related to the Coronavirus Vaccine and its effects on Stroke Survivor Patients

ABOUT IHW COUNCIL

Integrated Health and Wellbeing Council is a not-for-profit institution engaged in the health and wellbeing of human enterprise and existence. The council plays a pivotal and significant role through awareness and advocacy involving global leaders, countries, relevant ministries and government bodies, national health, environment, and education policymakers, medical technology, solutions, services and infrastructure providers, researchers, academia, health, education and wellness institutions, professionals, enthusiasts and influencers, key stakeholders, and grassroots-level organizations to bring about this permanent change in the mind of individuals, the global healthcare industry, and societies.

Over the past few months, IHW Council has become one of the leading and powerful web forum for the live web events and talk shows for the health and healthcare sector engaging government, corporate, individual, and social organizations with an overall 5 million reach, more than 1.5 lakhs live viewership, bringing together more than 100 corporate and 200 speakers for sharing their insight on the various key subject during COVID-19 pandemic.
